Education

Indian Institute of Technology (BHU) Varanasi

December 2020 - June 2025

BTech+MTech in Mechanical Engineering (CPI of 8.41)

Uttar Pradesh, India

Experience

Joveo | Backend Intern

December 2025 - Present

- Developed and contributed to **Java/Spring Boot microservices** deployed on **AWS**, integrating **PostgreSQL** and **Kafka** to enable scalable, event-driven architecture.
- Worked across **ATS** and **CRM integration flows** (**ATS to Joveo sync**, **job + apply URL pipelines**), gaining experience with recruitment data mapping and **full-funnel candidate tracking**.
- Improved **API performance** for multiple high-traffic widgets in **Unified Analytics**, Joveo's main revenue-generating product, by **optimizing queries**, **reducing response latency**, and **streamlining data processing**.

Tredence | Software Engineer

July 2025 - November 2025

- Developed a **FastAPI-based semantic extraction** pipeline using **OntoCast**, **LangGraph**, and **OpenAI API** to convert unstructured text into **RDF triples** and **domain ontologies**, reducing manual modeling effort by **60%**.
- Configured **Apache Jena Fuseki** to store and query **knowledge graphs** via **SPARQL** for **real-time insights**.

DataCurve (YC W24) | Freelancer

May 2025 - July 2025

- Authored **120+ original DSA problems** and solved **50+ unseen model-generated problems**.
- Contributed to iterative dataset refinement by solving and validating diverse problem types, which helped improve **LLM solution accuracy** on complex DSA tasks (e.g., **recursion**, **DP**, **trees**) from **60% to 75%** on internal benchmarks.

NeuroNexus Innovations | Software Engineer Intern

May 2024 - July 2024

- Improved the **authentication process** for newly signed-in users using **React OAuth** with **Google integration**.
- Developed backend logic for a **real-time chat widget** using **Socket.io** and **JavaScript**, enabling users to connect with support in **under 1 second**, increasing customer support engagement and reducing response time by **40%**.
- Wrote **E2E integration tests** using **Playwright** to validate different scenarios in the Neuronexus web app.

Projects

BookLoom - Full Stack Book Store Application | MongoDB, Express.js, React.js, Node.js, bcrypt.js, REST API

- Developed a **Book Store Application** enabling customers to browse and purchase books using various filters .
- Designed and Integrated **REST API based Cart and Order Management Systems** allowing users to easily manage selections before checkout and track their **order history** .
- Implemented secure user authentication using **JWT** and **bcrypt.js**, with **MongoDB** for efficient user data and order.

ChessGo - Real-Time Full Stack Chess Application | - Express.js, Node.js, Chess.js, Socket.io

- Built a real-time **PvP chess app** with drag-and-drop moves, spectating support, and enhanced interactive features.
- Established **WebSocket connections** using **Socket.io** for syncing the board state and managing player roles, while handling **game logic** with **Chess.js** to render a responsive and interactive chessboard.
- Developed frontend in **JavaScript** and backend in **Node.js** with **Express** to efficiently manage client connections and **real-time state updates**.

Achievements

- Codeforces: Expert** at Codeforces (**Max rating 1708**), Handle: **clowntk**
- Leetcode: Knight** at Leetcode (**Max rating 1977**), Handle: **ShibangDS**
- Google Kickstart** : Secured a **global rank of 1437** in **Farewell Round A**.
- Facebook (Meta) HackerCup** : Secured **global rank of 1269** in **Meta HackerCup 2024 Round 2**.
- Solved **1500+** Data Structures and Algorithm problems in various coding platforms LeetCode ,GFG.
- Flipkart Grid 6.0** : Qualified for **Level 2**, competing among over **4.8 lakh candidates** .
- National Level and Inter-IIT Chess** player. (U14 in 2015-16 , U17 in 2016-17)(2000+ rating on all formats).

Technical Skills

Languages: C++, Python, HTML/CSS, Java, JavaScript, SQL

Technologies/Frameworks/Libraries: MongoDB, Express.js, React.js, Node.js, Socket.io .

General: Data Structures and Algorithms, Operating Systems, DBMS, OOPs, Computer Networking
